COVID-19 Faceshields

Get superior protection against COVID-19 with Precision Converting faceshields

Precision Converting, a Division of Hisco, is now manufacturing disposable faceshields to help stop the spread of COVID-19. Unlike masks, faceshields provide an additional level of protection against the novel coronavirus by covering a larger portion of the face, thus reducing the risk of catching the virus.

Precision Converting PC-SAFEGUARD1-23601 faceshields provide superior optical clarity and are comfortable enough to wear all day.

Features/Benefits

- Protects facial area and associated mucous membranes (nose, mouth, eyes, ears)
- Made from a 3M anti-fogging 7mil clear polyester film, PU polyester foam cushion and 3M laminating adhesive, secured with a head strap
- Easy to put on and take off
- Comfortable fit
- Distortion-free
- Light/medium duty
- Less fogging than goggles
- No impact on breathing resistance
- No fit testing required
- Can be easily disinfected
- No impact on vocalization
- Does not impede facial nonverbal communication
- Lightweight and lays flat—easy to ship and distribute
- Ideal for local governments, law enforcement and health care facilities
