THE PRECISION CONVERTING PROCESS

Our deadline-driven team of application engineers and manufacturing specialists can help you optimize your design for production, thereby lowering your production cost. And with our broad spectrum of tooling and manufacturing capabilities, we can handle small orders to volumes in the millions.

MARKETS

Precision Converting provides innovative solutions and material expertise for a variety of industries and manufacturing challenges with the highest quality materials available.

ELECTRONICS ASSEMBLY

Find soldering equipment, chemicals, cleaning supplies, adhesives, hand and power tools, static control and more to build reliable, high-quality electronics.

AEROSPACE

We're a full stocking aerospace products supplier with local inventory of mission-critical products in AS9120 Rev B certified locations throughout North America.

GENERAL INDUSTRIAL

We carry adhesives, material handling, hand tools, paints, packaging and facility maintenance and repair supplies for manufacturing and assembly applications.

MEDICAL

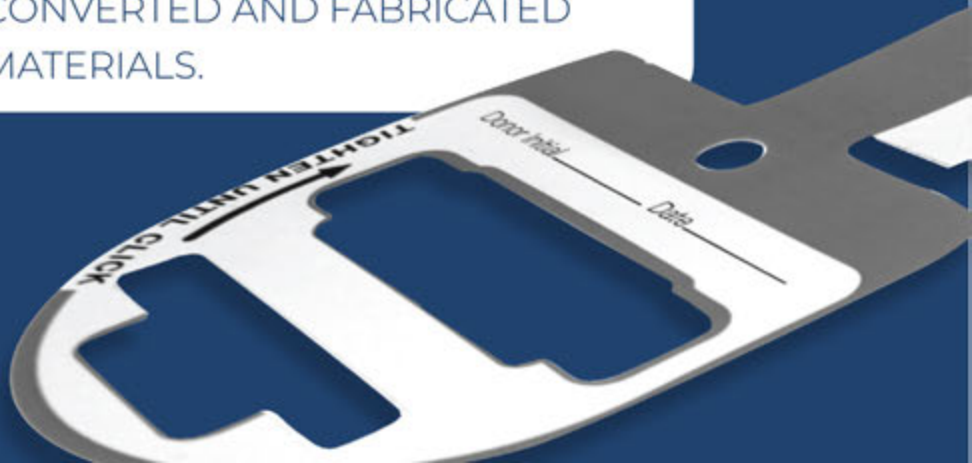

Hisco is an ISO 13485:2016 certified and FDA-registered medical manufacturer and 3M Preferred Converter for monitoring, fixation and diagnostics applications.

AUTOMOTIVE

Hisco is a leader in providing solutions for automotive manufacturing and assembly of traditional internal combustion and E-Mobility vehicles.

PRECISION CONVERTING IS YOUR
SOURCE FOR **HIGH-QUALITY**
AND **COST-EFFECTIVE** CUSTOM
CONVERTED AND FABRICATED
MATERIALS.

OUR CAPABILITIES

PROTYOTYPING

We offer CNC laser and CNC plotter-cutting specializing in tight tolerances as well as small production rotary and flatbed die cutting. CAD files can easily be created from existing parts with our vision systems.

DIE CUTTING

Our capacities include rotary and flat-bed stamping. We design and custom-cut shapes to meet any specifications requiring tight tolerances.

ADHESIVE BONDING

We provide the highest quality adhesive coatings such as: adhesive transfer tapes, double-coated tapes, double-coated foam tapes, high-bond-strength acrylic foam tapes, thermal bonding films and re-closable fasteners.

PRECISION SLITTING

Our offering includes precision lathe, traverse wound and rewind slitting with wide or narrow widths down to 0.100" wide. These capabilities are available for films, tapes, papers and foils.

SHEETING

We convert rolls of film, foil, papers and other materials into individual sheets quickly and economically. In addition, Precision Converting has Class 10,000 clean room capabilities to accommodate our customers requiring sheeting for materials in special environments.

CLEANROOM

Precision Converting has Class 10,000 cleanroom capabilities to accommodate our customers requiring sheeting for materials in special environments.

COMPLEX LAMINATING

We can layer as many as four (4) substrates to meet your exact requirements. When combining multiple materials, lamination increases functionality. Pressure and heat lamination methods are our expertise.

SPECIALTY ASSEMBLY

We will help you optimize your design as well as material selection and production from start to finish. Our experience in specialty assembly will also ensure that your product will perform to your specifications.

SPOOLING & WINDING

We provide innovative solutions for challenging spooling, winding and traverse winding applications with the highest quality materials including: protective film, tapes, foils, coated products and laminates, and other specialty materials.

PRINTING

Our capabilities include two-color printing, available during rotary die cutting for applications like tape, kit labels, packaging materials, tamper-proof labels and more.

MATERIALS WE CONVERT

COMPRESSED CELLULOSE GASKETS & INSULATORS

CORK & RUBBER COMPOSITES

FELTS

Urethane • Neoprene • EPDM • Nitrile • SBR & Silicone •
Open and closed cell foams of various densities / firmness

FILMS

Acetate • Nylon • Polyester • Polyimide • PVC • Polypropylene •
Polycarbonate • Polyurethane & more

FOAMS

FOILS

Copper • Brass • Aluminum

HOOK & LOOP

3M & Velcro materials

RUBBER ELASTOMERS

Urethane • Neoprene • EPDM • Nitrile SBR & Silicone
(various durometers available)

PAPERS

Fish paper & release liners

PLASTIC SHEET

TAPES / ADHESIVES

Pressure-sensitive tapes (single- or double-coated)

THERMALLY CONDUCTIVE

Silicone • Putty • Grease • Polyimide • Fiberglass • Foils
