

eMobility

Find innovative **solutions** to your eMobility manufacturing challenges in one place

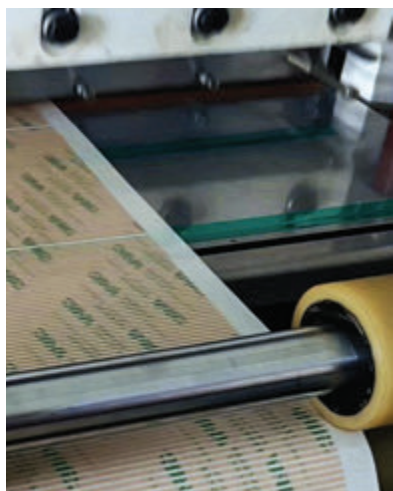

Hisco provides solutions to your eMobility manufacturing challenges using over 75 years of combined materials expertise, design assistance, and world-class supplier partners. Our highly trained technical staff will collaborate directly with your engineering team to ensure an ideal solution that specifies the right material, the correct design, and in the correct form for optimum manufacturing efficiency.

We Drive:

- The **Function** you need
- In the **Form** you need
- With the **Service** you deserve

Improve Your Bottom Line with Custom-Engineered Products, Components and Packaging Solutions

Precision Converting, a division of Hisco, provides custom-engineered components using flexible substrates derived from polymeric, elastomeric, adhesive film, and foil materials. Our components utilize both solid and cellular materials, films, foils, and elastomers for critical design functions such as thermal management, electrical insulation, EMI/RFI shielding, noise & vibration control, bonding, gasketing, and sealing. Within the eMobility design space, we offer solutions pertaining to thermal management, thermal event prevention, battery cell dielectric insulation, thermal cycling/stress mitigation, flame penetration, and environmental sealing.

AdhesiveMaterialsGroup

Adhesive Materials Group (AMG) is a division of Hisco specializing in the custom repackaging and labeling of liquid epoxies, silicones, acrylics, resins, encapsulants, grease and other specialty materials from world-class suppliers such as:

3M **LOCTITE**

WACKER

Elkem

LORD

Ask Us How™

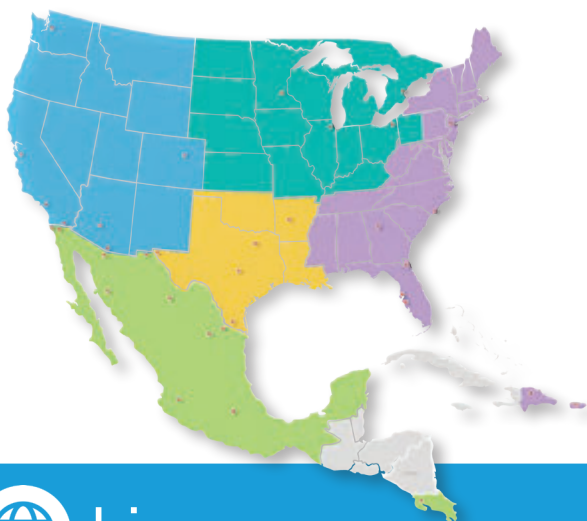

AMG focuses on efficiency for your product, application, storage and quality; reducing costs and driving profitability.

“Smart Factory” Solutions for eMobility

Hisco offers a suite of RFID tracking and VMI vending solutions to enable accurate, real-time visibility and management of your manufacturing operations, assets and materials. With a focus on Industry 4.0, our RFID platform can integrate with any ERP system and is fully compatible with IoT ready devices to help reduce risk, minimize loss and improve your overall processes.

The Service You Deserve

With 37 stocking locations throughout North America, the power of Hisco is always close at hand. Hisco branches maintain local inventory for rapid fulfillment, and our close relationships with key supplier-partners ensure access to a full range of materials and the best possible pricing.
